

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts along with other lift trucks could have particular labels utilized in certain hazardous locations. The label denotes that this specific model of lift truck meets the minimum standards of ANSI/UL 553 used for electric lift trucks or ANSI/UL 558 utilized for internal combustion engine lift trucks.

The use for labels utilized for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Ask your local insurance provider and Fire Marshall for further information about the approved uses of industrial powered trucks in your application.

If the particular forklift meets the outlined standards, labels can be placed. A labeled forklift would show the type of designation placed on the nameplate and will have a correctly corresponding label attached.
